- Dimensions: 3050 x 1220 mm / 2800x1300 mm / 2800 x 1250 mm / 2800 x 1220 mm
- Thickness: 18 mm
- Base: MDF

Spectrum High Gloss is a collection of high gloss panels. Thanks to the technology individually developed by the company Niemann Polska, a thin layer (75 μ) of transparent PET (polyethylene terephthalate) coating is applied to the panel, giving it a very high gloss level of >85 gloss units.

TECHNICAL INFORMATION

Furniture board coated in this way is resistant to scratches, dents and chemicals. It does not require special maintenance products, and there is no fading effect after a long period of use, as in the case of varnished surfaces.

Base board – MDF

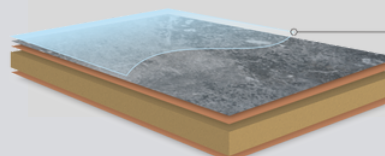

The back of the board is melamine in the color of the front.

Fronts made of Spectrum boards give the kitchen a modern look, are simple in form, and at the same time elegant and tasteful.
