

# KRISTALL

Exclusive line  
of furniture boards

Available in matte  
and high gloss

The laminate gives off the  
dept of glass, and due to its  
shatter-proof properties,  
ensures easy processing  
and safety. Doors made  
from Kristall boards, when  
compared to conventional  
glass covered doors, are  
much lighter, safer, and can  
be processed just like regular  
furniture boards.

✓ High resistance  
against scratching

💧 Ideal depth  
of color

# FURNITURE PANELS

FOR AESTHETICS ORIENTED  
FURNITURE DESIGNERS  
AND MANUFACTURERS

# Why us?

**EXPERIENCE**  
Practical German expertise in furniture component  
production, continued in Poland for over a decade.

**PRODUCT DEVELOPMENT**  
Continuous pursuit of product improvement and its  
production process. Constant search for new and unique  
materials.

**IDEAS**  
A wide international sales network and a well-thought-  
out materials choices are a source of inspiration and  
experience regarding products, interior trends,  
marketing and sales strategies.

**MARKET PRESENCE**  
Due to our warehouse and production facility in Poland,  
we ideally connect the German "know-how" with the  
Polish tenacity and flexibility which is critical in the  
market.

**ECO-AWARENESS**  
With regard to the environment and its care, we have  
successfully implemented proecological changes in our  
organization, facility operations, and have expanded our  
product offer to include recycled products.

# SPECTRUM

**Spectrum New product line** composed of the most popular decors of this season. This offer combines attractive styles with a wealth of surface finish choices. In this collection, you will find products in matte, high gloss, mono-colored, wood-like, and even metal decors.

This individually developed and perfected manufacturing process is what differentiates this product. Athin layer of transparent PET (polyethylene terephthalate) enhances the quality of the surface.

## GLOSS

MDF or MFC laminated with a 75µ thick transparent PET film in gloss. Measured reflectivity of >85 gloss units. Outer layer is resistant against scratching, chemical agents, and UV radiation. Does not require special products for maintenance.

Board backing – color matched melamine.

Comfortable for manufacturing and use

High resistance against scratching

Wood-like decors

Matching edgebanding

Looks great with Spectrum Matte

## METAL

MDF boards laminated with a PET film with an additional metal layer. Three metal decors are available in two different surface finishes – smooth and crumble, which provides a “hammered” look.

Panel backing – gray PP laminate.

Comfortable for manufacturing and use

Matching edgebanding

THICKNESS: 18 mm  
BASE: MDF  
EDGE-BANDING: 23mm x 1mm

# ACRYLUX

Boards covered with high gloss ABS/PMMA 0.7 – 0.8 mm laminate, which ensures high resistance to scratches, mechanical damage, chemical agents, and UV radiation.

Board produced on the basis of MDF board, back finished with white PP balancing laminate. Double-sided Acrylux lamination also available.

High resistance scratching

Ideal depth of color

Alternative to painted surfaces

Matching edgebanding

THICKNESS: 18 mm, 6-48 mm by request  
BASE: MDF, chipboard available by request

# ACRYLUX MAT

## Anti-fingerprint

Boards are covered with a 0.5 mm thick ABS/PMMA laminate in a supermatte finish. The laminate is treated to have a hydrophobic layer (AFP).

## ACRYLUX MAT METALLIC

Acrylic furniture boards, covered with a matte ABS/PMMA laminate 0,5-0,7 mm thick. The Surface is impregnated with subtle metallic particles that grant apolished, metallic look.

Backing finish: white/gray/matched PP balancing laminate.

High resistance scratching

Resistant against fingerprints

Alternative to painted surfaces

# TEXTURE

## ONYX

Boards with stone-like texture, impregnated with subtle reflective particles. The irregular, stone-like texture creates an excellent design contrast in both large and small interiors.

The boards are more affordable and easier to process when compared to natural stone. It is also user-friendly – it does not require time-consuming maintenance and preparation, which are crucial for natural stone.

Due to the PP laminate, the boards have increased moisture resistance.

# VISION MAT AFP

Furniture boards covered with a PET laminate 0,3 mm thick, with hydrophobic properties in a delicate satin finish, are a modern solution that is becoming increasingly popular in the furniture industry.

Panel backing - PP laminate.

High resistance against scratches, chemical agents, and UV radiation

Ideal depth of color

Resistant against fingerprints

THICKNESS: 18 mm, 6-48 mm by request  
BASE: MDF, chipboard available by request

# SAVIOLA

## NEW COLLECTION MADE IN ITALY

Eco-ethical company, who's guiding values are: the Earth, Environment, People, Quality, and Innovation.

The central concept of ecological furniture board production is the recycling of once-used wooden materials, from products like old furniture or pallets. This ensures that new furniture production can continue without the introduction of new wood stock from cutting trees.

The production of ecological boards is part of an integrated and repeatable cycle, beginning with the collection of used materials, and ending with a new, functional product. The process is so thorough in its approach, even those materials that can't be recycled in the manufacturing process are used in the production of green energy, for heat and electricity, as biomass to power the whole process.

The Saviola Group cares for the environment and its resources, giving its clients the unprecedented choice of protecting the planet by choosing ecological furniture products.

The Saviola Group's offer comprises several thousand combinations of decors and textures.

An individual selection can be made to satisfy the needs on a particular project.
